

Movies for Science Parent Permission Form

During the school year, I may choose to use one or more of the following full-length movies in science class. The purpose of using such videos within science curriculum is to inspire students to develop practical engineering and problem-solving skills that can be used in a variety of settings and careers throughout our lives. Such knowledge, skills and attitudes are part of STEM education (Science, Technology, Engineering, and Math).

Without parent/guardian permission, your student will not be allowed to participate if one of these movies is shown as a planned educational activity. An alternative assignment will be provided at an alternate location, which must be completed to earn replacement credit for the missed activity.

Approved Movie List: Apollo 13 (1995, PG), Arrival (2016, PG-13), Avatar (2009, PG-13), Contact (1997, PG), Ender's Game (2013, PG-13), Gattaca (1997, PG-13), Gorillas in the Mist (1988, PG-13), Hidden Figures (2016, PG), Hitchhiker's Guide to the Galaxy (2005, PG), Interstellar (2014, PG-13), Jurassic Park (1993, PG-13), IQ (1994, PG), October Sky (1999, PG), Radio (2003, PG), Second Hand Lions (2003, PG), Temple Grandin (2010, PG), Time Machine (2002, PG-13), The Martian (2015, PG-13), The Right Stuff (1983, PG), The Sandlot (1993, PG), Tomorrowland (2015, PG), Wall-E (2008, PG)

You give your student permission to watch any of these movies that might be used in Mr. Powner's science class.

Please provide your answers to the parent specific questions below

Optional: Comments, Questions, or Concerns
