**Which microscopy lab is this?** \_\_\_\_\_

**Instructions:** Be sure to label which microscopy lab this is above. Follow all instructions of the instructor and any handouts you are given. Find an object on each slide. Have the instructor verify that you have done this correctly. Then do one of the following for all slides:

1. Take a picture through the eyepiece with your phone camera, past over the field of vision circle <or>
2. Draw what you see in the field of vision circle (with the Kami tool or download/print/do by hand)
