1. It is certain, as the gene for red hair is passed by parents to offspring.

2. It is not possible to say for certain, as the child will also receive genes for hair color from his or her father.

1. How likely is it that the woman in the photo had an ancestor with red hair?
2. Can you be sure that this woman's son or daughter will have red hair?
3. If this woman and her husband both have red hair, will their children have red hair?
