1. Answers will vary. Students might want to know if the person's vision is always poor or has recently changed.
2. Answers will vary. Students might want to know if other senses are also affected by the medication.

1. The photo shows the vision of a person on medication. What would help you determine if this person's vision was affected by the drug?
2. If the person does not usually see in this way, what would you want to know about the person's other senses such as sight and hearing?
3. If the medication causes impaired vision, what advice might you give this person?
